In the Claims

Please amend the claims as follows. Applicants present a full set of claims showing markups of the claims with insertions and deletions indicated by underlining and strikethrough text, respectively.

- 1-28. (Canceled)
- 29. (Currently amended) A composition comprising

DAPH1 (4,5-dianilinophthalimide) one or more compounds that decrease membrane depolarization of neuronal cells caused by aggregated β -amyloid ($\Delta\beta$) protein degradation products, and

one or more compounds that decrease calcium influx of neuronal cells caused by aggregated β -amyloid (A β) protein degradation products.

30-33. (Canceled)

- 34. (Withdrawn) A method for treating Alzheimer's disease, comprising administering an Aβ vaccine to a subject in need of such treatment, administering to the subject an effective amount of the composition of claim 29.
- 35-48. (Canceled)
- 49. (New) The composition of claim 29, wherein the compound that decreases calcium influx of neuronal cells caused by aggregated β -amyloid (A β) protein degradation products is NBQX (2,3-dihydroxy-nitro-7-sulfamoyl-benzo[f]quinoxaline).
